Project results

OUR EUROPEAN SUSTAINABILITY EXPERT (ESE) PROFILE AND CURRICULUM IS READY!

The ESE Profile and Curriculum produced by the SUSTAIN-EU project consortium has been developed and has successfully passed the reviewing face! The partners will start developing the contents of the curriculum's units! Stay tuned! The ESE Profile and Curriculum will be soon open to everyone in the project's page!

Partner activities and meetings

Since the project's launch in Paderborn (Germany) in February 2025, the partners have been holding different online meetings (in February, March 2025) to keep up with the work.

Once that the existing Sustainability Expert Profiles have been benchmarked across consortium's countries (PT, IE, RO, AT, IT, DE) and aggregated into one document, they were used to develop the Competence Matrix and the ESE Profile and Curriculum. Valuable feedback was received during a peer review process achieved by the partners.

Our consortium also developed guidelines and templates for Curriculum Units content, preparing thus the next phase of the project.

Regularly, risks have been analyzed and the risk register was constantly updated.

To increase the impact, promotional materials have been created and disseminated: leaflet, brochure, roll-up, press release and short video.

Next steps

In the following months we develop a Training Methodology for VET professionals to support the successful implementation of the European Sustainability Expert Curriculum, providing expert guidance on sustainability.

Furthermore, we will continue disseminating our achievements and results, while approaching new project phases: designing an eCourse, a Train-the-Trainer Programme, piloting and implementing it.
